## PRESENTACION

El presente informe fue confeccionado por el consorcio LEN & ASOCIADOS y la División de Ingeniería Hidráulica y Ambiental de DICTUC S.A., filial de la Pontificia Universidad Católica de Chile, para la Dirección General de Aguas (DGA), en el marco del convenio “**CATASTRO DE OBRAS EN CAUCES NATURALES Y AREAS DE RESTRICCION**”.

La consultoría considera la ejecución de las siguientes etapas:

- **Etapas I**            Catastros de obras de captación de agua subterránea en áreas de restricción.
- **Etapas II**            Catastros de obras menores en cauces naturales del Gran Santiago.
- **Etapas III**            Elaboración de términos de referencias de estudio orientado a identificar y establecer principales cauces naturales de uso público del país.

Cada una de las Etapas constituye un estudio específico e independiente, las cuales se ejecutaron en forma paralela. En consideración de lo anterior, el producto final obtenido se presentan en volúmenes separados, de acuerdo al siguiente detalle:

- **Volumen I**        Etapa I: Informe y Catastros de Resultados (1 Tomo)
- **Volumen II**        Etapa II: Informe y Fichas de Terreno (3 Tomos)
- **Volumen III**        Etapa III: Informe y Términos de Referencia (1 Tomo)

El presente documento corresponde al Volumen I, que incluye la Etapa I del Estudio.

## RESUMEN

### **Etapa I: Catastros de Obras de Captación de Agua Subterránea en Áreas de Restricción**

El objetivo de esta etapa del estudio fue confeccionar bases de datos que sirvieran para aprobar los Inventarios Públicos de Extracciones Autorizadas de Aguas Subterráneas en sectores acuíferos con Áreas de Restricción y otros de interés para la Dirección General de Aguas. De esta forma, la DGA a través de la Unidad de Fiscalización, generará las bases para la creación de las Comunidades de Agua Subterránea y el Control de Extracciones.

Los catastros incorporan los datos contenidos en las diversas fuentes de información que posee la Dirección General de Aguas, así como la información histórica contenida en los Conservadores de Bienes Raíces y Juzgados de Letras correspondientes.

Los principales campos del catastro son: nombre del titular, coordenadas de ubicación del punto de captación (UTM, Datum PSAM56), sector acuífero, cuenca, subcuenca, subsubcuenca, comuna, número y fecha de resolución, tipo de derecho, caudal otorgado (l/s), número de registro y fecha en el Conservador de Bienes Raíces. Los catastros confeccionados para cada uno de los sectores considerados se han incorporado en una base de datos con plataforma en Microsoft Access, constituyendo un programa auto-ejecutable para su consulta.

### **Etapa II: Catastros de Obras Menores en Cauces Naturales del Gran Santiago**

El objetivo de esta etapa del estudio fue generar un catastro de las obras de modificación de cauces naturales tipificadas en los artículos 41 y 171 del Código de Aguas, ubicadas en los sectores del piedemonte de las comunas de Las Condes, La Reina, Peñalolén, La Florida, Puente Alto y San José de Maipo (sólo zona urbana).

Para cada cauce natural recorrido, en este caso, se realizó una ficha con sus principales características y un cuadro resumen con las obras catastradas, en el cual se indica si cuentan o no con expediente de la DGA-RM y el grado de peligro o riesgo que representa la obra para asentamientos humanos.

Los catastros confeccionados para cada uno de los cauces o localidades consideradas se han incorporado en una base de datos con plataforma en Microsoft Access, constituyendo un programa auto-ejecutable para su consulta.

### **Etapa III: Elaboración de Términos de Referencias de Estudio para Identificar y Establecer Principales Cauces Naturales de Uso Público del País**

El objetivo de esta etapa del estudio fue establecer una metodología que permita identificar y establecer, desde un punto vista técnico - legal, qué es un Cauce Natural de Uso Público, con la finalidad de generar términos de referencia para la elaboración, en una etapa posterior, de estudios orientados a la identificación y establecimiento de los mismos.

Se revisó aspectos jurídico – administrativos y técnicos, tanto del ámbito nacional como vinculados a la experiencia internacional en el tema. Entre los resultados del estudio cabe señalar: identificación del problema, análisis de información bibliográfica, objetivos, cobertura del estudio, actividades, metodología, cronograma, etc.

# **I CATASTROS DE OBRAS DE CAPTACION DE AGUA SUBTERRANEA EN AREAS DE RESTRICCIÓN**

---

## **I.1 INTRODUCCION**

El propósito de esta etapa del estudio es confeccionar bases de datos con el fin de aprobar los Inventarios Públicos de Extracciones Autorizadas de Aguas Subterráneas en sectores acuíferos con Áreas de Restricción y otros de interés para la Dirección General de Aguas.

De esta forma, la DGA a través de su Unidad de Fiscalización, pretende generar las bases para la creación de las Comunidades de Agua Subterránea y el Control de Extracciones.

A modo de resumen, se puede señalar que la pauta de trabajo propuesta para esta etapa del proyecto fue lograda en un 100 %. Lo anterior, en consideración tanto de los requerimientos establecidos por la propia Dirección General de Aguas en las bases administrativas y técnicas, como en la propuesta técnica por parte de este Consorcio Consultor.

Los catastros incorporan la información contenida en las diversas fuentes de información que posee la Dirección General de Aguas, así como la información histórica contenida en los Conservadores de Bienes Raíces y Juzgados de Letras correspondientes.

Respecto de la información lograda en el SAG, no fue posible establecer la titularidad de los derechos establecidos en virtud del Artículo 5 Transitorio del Código de Aguas, así como algunas características fundamentales de estos mismos derechos, por lo que la información debe ser considerada como un primer avance en la identificación de derechos de aprovechamiento de aguas subterráneas otorgados a través de este procedimiento.

---

## **I.2 AREAS DE RESTRICCIÓN Y DE INTERÉS PARA LA DGA**

Las áreas de restricción consideradas en el presente Estudio se indican en la Tabla I.1. En la Tabla I.2 se indica la resolución DGA y la fecha en que se establece el área de restricción, cuando corresponde.

Tabla I.1. Acuíferos con áreas de restricción constituidas o en trámite incluidos en el estudio.

| Prioridad | Área                                     | Región |
|-----------|--|--------|
| 1         | Petorca                                  | V      |
| 2         | La Ligua                                 | V      |

### I.3 DESARROLLO

Las principales fuentes de información consultadas en esta etapa del estudio se pueden resumir en:

- Dirección General de Aguas
  - Estudios elaborados por el Departamento de Administración de Recursos Hídricos (DARH, DGA)
  - Registros elaborados por la Unidad de Fiscalización (DGA).
  - Sistema de Archivos de Expedientes Digitalizados por el Centro de Información de Recursos Hídricos (CIRH).
  - Sistema CPA (DGA).
  - Intranet MOP. Resoluciones de derechos de aprovechamiento (CIRH).
  - Diario Oficial (Internet). Base de datos de solicitudes de derechos de aprovechamiento.
  - Registros de las Oficinas Regionales DGA (Primera, Segunda, Cuarta, Quinta y Metropolitana): Revisión de los registros de control de expedientes y Revisión de expedientes.
  - Definición SIG de los sectores considerados en el proyecto y coberturas relacionadas (Sectores Acuíferos, Cuencas, Subcuencas, Subsubcuencas y Comunas).

- Conservadores de Bienes Raíces.
- Juzgados de Letras.
- Servicio Agrícola Ganadero.
- Trabajo en terreno.

La información recogida fue validada contrastando las distintas fuentes consultadas en paralelo, de manera que los resultados deben ser considerados como una actualización y corrección de los registros elaborados por la propia DGA a través de sus distintas unidades. En particular se trabajó en la identificación de los siguientes campos: nombre del titular, coordenadas de ubicación del punto de captación (UTM, Datum PSAM56), sector acuífero, cuenca, subcuenca, subsubcuenca, comuna, número y fecha de resolución, tipo de derecho, caudal otorgado (l/s), número de registro y fecha en el Conservador de Bienes Raíces.

Los catastros confeccionados para cada uno de los sectores considerados se han incorporado en una base de datos con plataforma en Microsoft Access, constituyendo un programa auto-ejecutable para su consulta.

Los documentos considerados como válidos de acuerdo a su importancia son los siguientes:

1. Resolución DGA con Toma de Razón por Contraloría General de la República.
2. Resolución DGA Regional (Expedientes VT y VPC).
3. Número y fecha de inscripción en el Conservador de Bienes Raíces.
4. Sentencia Judicial (Expediente NR).
5. Seguimiento e identificación de la obra de captación en terreno por profesionales de este Consorcio Consultor.
6. Informe Técnico DGA (contenido en expediente).
7. Informe de Visita a Terreno DGA (contenido en expediente).
8. Informe técnico aportado por el titular del derecho (contenido en expediente).
9. Solicitud original.
10. Publicación en Diario Oficial.

De acuerdo a lo anterior se verificaron los siguientes campos:

- Actualización del estado de situación de los registros de solicitudes en trámite o pendiente tanto en Región como en el DARH (Estado de Situación P-REG o P-DARH).
- Actualización de los registros de nuevos derechos con resolución aprobatoria, tanto definitivos como provisionales (Expedientes ND).
- Actualización de los registros de solicitudes de regularización de derechos de aprovechamiento enviados al Juez (Expedientes NR).
- Actualización de los registros de cambio de punto de captación o traslado del ejercicio del derecho de aprovechamiento (Expedientes VT y VPC).

Las abreviaturas y símbolos utilizados en las planillas de registro se señalan en la Tabla I.3.

Tabla I.3. Cuadro resumen de símbolos y significado incluidos en los registros.

| <b>Símbolo</b> | <b>Significado</b>         | <b>Nombre de la Columna Asociada</b> | <b>Observación</b>   |
|----------------|----------------------------|--------------------------------------|--|
| S/I            | Sin Información.           | Todas                                |  |
| R              | Regional                   | Resolución                           | Depende del Tipo de Expediente y las Atribuciones del Director Regional.                       |
| SJ             | Sentencia Judicial         | Resolución                           |  |
| SAG            | Servicio Agrícola Ganadero | Resolución                           |  |
| CD             | Conversión por DICTUC      | UTM Norte y Este (m), Q oto(l/s)     | Coordenada UTM Norte y Este (m) según Datum SAM 1956 y Caudal Otorgado                         |
| D              | Distribución de Caudales   | Q oto(l/s)                           | Caudal Otorgado con distribución mensual o con tasa anual por hectárea de superficie de riego. |
| P              | Provisional                | Derecho                              | Derecho de Aprovechamiento Provisional.  |

### **I.3.1 Pauta de Trabajo Recopilación Información DGA**

A partir de la información preliminar que manejan las distintas unidades de la Dirección General de Aguas, ya identificadas previamente, se procede a verificar la información existente y actualizar aquellos registros cuyo estado de situación no corresponda.

La información base para validar estos registros la constituyen las resoluciones DGA, que se encuentran en la base de datos de intranet del Ministerio de Obras Públicas y en segundo término el Sistema CPA, donde a partir de un proyecto paralelo ejecutado por DICTUC S.A. se han corregido y actualizado los expedientes DGA con derechos de aprovechamiento debidamente otorgados por Resolución del Servicio.

Una vez incorporada la información de titulares, coordenadas del punto de captación (UTM, Datum PSAM56), caudal otorgado (l/s), N° de Resolución DGA y Fecha de la misma, se agrega la información recogida desde los Conservadores de Bienes Raíces, Juzgados de Letras, y la campaña de terreno. Esta última labor, se ejecutó en detalle para los sectores acuíferos de la IV y V Región, considerados en el Estudio.

A lo anterior hay que agregar la labor que se realizó en las Oficinas Regionales DGA de la I, II, IV, V y RM, donde se pudo revisar íntegramente la información contenida en los propios expedientes DGA y desde donde se obtuvo importante información asociada fundamentalmente a identificar el punto de captación.

La identificación del Sector Acuífero, Comuna, Cuenca, Subcuenca y Subsubcuenca, se realizó utilizando una plataforma SIG (Arcview 3.1), donde se incorporan cada una de estas coberturas digitales y a partir de las coordenadas de los puntos de captación se cruza e integra la información de manera automática.

### **I.3.2 Pauta de Trabajo Recopilación de Información Conservadores de Bienes Raíces**

A partir de los catastros de derechos de aprovechamiento preliminares y el conocimiento de la comuna, se procedió a identificar los Conservadores de Bienes Raíces correspondientes.

En la Tabla I.4 se presenta un resumen de los Conservadores de Bienes Raíces visitados.

Identificado el Conservador de Bienes Raíces, se procedió a determinar la existencia de los correspondientes libros índices del Registro de Propiedad de Aguas, para los años correspondientes a las resoluciones administrativas que otorgaron los derechos de aprovechamiento cuya inscripción se buscaba.

Estos libros fueron revisados, a partir de la fecha de constitución de cada derecho de aprovechamiento individualizado en la base de dato correspondiente, y cuando su inscripción no era encontrada en el libro correspondiente al año en que se dictó la resolución constitutoria del mismo, se procedía a revisar los libros índices de los 10 años siguientes. Esta situación se produce, debido a que en muchos casos el titular del derecho de aprovechamiento, procedió a reducir a escritura pública e inscribir el derecho con posterioridad al año calendario en que se dictó la resolución administrativa que le concedió el derecho, o bien nunca lo inscribió en el Registro de Propiedad de Aguas del Conservador de Bienes Raíces competente.

Luego, una vez encontrada la inscripción respectiva en el libro índice, se procedía a examinar el libro registro correspondiente, de modo de verificar la foja y número de la inscripción, como también el contenido de la misma, y las anotaciones marginales, a fin de revisar las transferencias del derecho de aprovechamiento cuyo título se revisa. De la información obtenida se dejó constancia escrita en fichas, las que posteriormente se ingresaron a la respectiva base de datos computacional.

Hacemos notar que existen derechos que han sido transferidos varias veces en forma parcial, por lo que resulta impracticable determinar su propietario actual, además, el derecho puede volver a ser transferido al día siguiente de aquél en que se terminó de estudiar su respectiva inscripción en el Conservador.

En consideración a lo anterior, se ha privilegiado la obtención de la inscripción original del derecho, en los casos en que se cuente con esta información.

La información lograda desde los Conservadores de Bienes Raíces, ha sido incorporada en los catastros definitivos completando los campos de nombre del Conservador (CBR), Fojas, Número y Año.

Tabla I.4. Conservadores de Bienes Raíces involucrados en el Estudio.

### **I.3.3 Pauta de Trabajo Recopilación de Información Juzgados de Letras**

Identificados los expedientes administrativos sobre regularización de derechos de aprovechamiento de aguas subterráneas a través del procedimiento establecido por el artículo 2° Transitorio del Código de Aguas, que recaen sobre recursos hídricos en las zonas acuíferas objeto del presente estudio, se procedió a determinar para cada solicitud en particular, el número y fecha del oficio mediante el cual la Dirección General de Aguas remite, en su caso, a la Corte de Apelaciones respectiva o al tribunal de turno correspondiente, el expediente administrativo con el respectivo informe técnico.

Determinada la fecha y el número del oficio de la Dirección General de Aguas, se procede a identificar el tribunal en el que se tramita la solicitud de regularización de derechos de aprovechamiento de aguas, lo que se realiza, según sea el caso, en la Corte de Apelaciones respectiva, cuando el oficio de la Dirección General de Aguas debe ingresar a distribución en la Corte para la determinación del tribunal competente o directamente en el Tribunal de turno competente. Este procedimiento se realizó buscando tanto a través del ingreso del oficio de la Dirección General de Aguas, como a través del nombre y RUT de los solicitantes.

Establecido el tribunal, se debe identificar el Rol de tramitación de la causa, a través del examen de los libros de ingreso del tribunal correspondiente al año en que se encuentra fechado el oficio de la Dirección General de Aguas que remite el expediente administrativo, ya que sólo respecto de los tribunales civiles de Santiago es posible obtener la información por vía sistema computacional, información que no siempre es completa.

Determinado el rol de la causa, dependiendo del tribunal de que se trate y de los medios con que este cuente, se procede a indagar el estado de tramitación de la causa, esto es si se encuentra pendiente, con sentencia de primera instancia, en apelación o archivado.

Del análisis efectuado en cada sector, se observa lo siguiente:

- En un gran número de solicitudes, no fue posible identificar tribunal ni rol al cual fueron remitidos los antecedentes mediante oficio de la Dirección General de Aguas, sobre todo en aquellos casos en que los oficios ingresaron a distribución por la Corte de Apelaciones.
- También se determinó, que un porcentaje muy alto de las causas, se encuentran archivadas por el tribunal, por no haberse impulsado debidamente por los interesados la tramitación de la gestión judicial. Estas causas pueden ser desarchivadas por los interesados a objeto de seguir adelante su tramitación ante el tribunal.
- En los casos en que se pudo determinar que se dictó sentencia de primera instancia, estas son resoluciones favorables a los interesados, esto es que acogen la solicitud de regularización y ordenan su inscripción en el Registro de Propiedad de Aguas del Conservador de Bienes Raíces competente.

#### **I.3.4 Pauta de Trabajo Recopilación de Información SAG**

La información recopilada en el Servicio Agrícola y Ganadero, en el Sub- departamento de Tenencia de Tierras y Aguas, ubicado en Avda. Alonso Ovalle N° 1329 de la ciudad de Santiago, está referida a la determinación de los derechos de aprovechamiento de aguas subterráneas provenientes de los predios expropiados total o parcialmente por la Corporación de Reforma Agraria, que cuentan con plan de distribución de aguas aprobado mediante decreto CORA o Resolución SAG.

Por aplicación de las disposiciones contenidas en la Ley 16.640, Ley sobre Reforma Agraria, norma que actualmente se encuentra derogada por la Ley N° 18.755 de 1.989, Orgánica del Servicio Agrícola y Ganadero, el país llevó adelante un proceso de racionalización de la propiedad agrícola, que se tradujo en la expropiación de los predios que excedían el número de hectáreas básicas de riego establecidas en ella, conjuntamente con las aguas destinadas a su beneficio.

Respecto de las aguas, el Decreto con Fuerza de Ley N° 162 de 1.969, también llamado Código de Aguas de 1.969 (que reunió en un solo cuerpo legal la mayoría de las disposiciones legales sobre aguas contenidas en la Ley N° 9.909 de 1951 y la Ley 16.640 de 1.967), estableció en su artículo 12, la imposibilidad de que los derechos de aprovechamiento pudiesen enajenarse con independencia del predio o industria a los cuales estuvieren destinados, disponiendo además, que tratándose de transferencia o adjudicación parcial de parte de las tierras de un predio, debía presentarse previamente, para la aprobación de la Dirección General de Aguas, el correspondiente proyecto de distribución de aguas; aprobada la distribución, la Dirección General de Aguas, debía otorgar al adquirente o adjudicatario de dichas tierras el respectivo derecho de aprovechamiento.

La citada norma del Código de Aguas de 1.969, fue derogada tácitamente por los artículos 8° y 4° transitorio del Decreto Ley N° 2.603 de 18 de abril de 1.979, y más tarde, derogada expresamente por el Decreto con Fuerza de Ley N° 1-2.603 de 3 de agosto de ese mismo año,

normativa que tuvo por finalidad restituir el régimen de propiedad sobre las aguas, y que constituyen un antecedente basal del Código de Aguas de 1.981.

Rezago de las consecuencias producidas por Ley 16.640 de 1.967 sobre el estatuto de propiedad de los derechos de aprovechamiento de aguas, constituye el artículo 5° transitorio del Código de Aguas vigente, que establece un procedimiento destinado a determinar y regularizar la inscripción de los derechos de aprovechamiento provenientes de los predios expropiados total o parcialmente o adquiridos a cualquier título por aplicación de las leyes N°s. 15.020 y 16.640, que cuentan con plan de distribución de aguas aprobado.

En conformidad la normativa señalada, para regularizar la propiedad de los derechos de aprovechamiento de aguas provenientes del proceso de reforma agraria, se requiere previamente, contar con la determinación que efectúe el SAG, de los derechos de aprovechamiento que correspondan en proporción a la extensión regada, a cada predio asignado, a la reserva, y al sector excluido del inmueble expropiado.

En algunos casos, existen predios expropiados que cuentan con el plan de distribución de aguas, el cual fue establecido en su momento por el correspondiente Decreto CORA o por resolución SAG. Atendida esta situación, se decidió revisar todos los predios expropiados que contaran con plan de distribución de aguas, en lo que fuere atingente a las aguas subterráneas, ubicados en las comunas sobre las cuales se ubican las áreas de interés para este estudio.

La recopilación de antecedentes entregó los siguientes parámetros de información: Comuna, identificación del proyecto de parcelación, rol de los inmuebles afectos, acto administrativo sancionatorio (con identificación de fecha e institución), ubicación del pozo (solo en aquellos casos en que se señalaba), caudal, distribución del caudal entre las parcelas de acuerdo a su cabida.

Esta información no incluye el nombre de los asignatarios de las parcelas a las cuales se destinan los referidos derechos de aprovechamiento de aguas, ello en atención a las siguientes razones:

- La asignación de las aguas era a las tierras y no a los adjudicatarios de estas, ya que hasta la derogación de la Ley 16.640, y normas pertinentes del Decreto con Fuerza de Ley N° 162 de 1.969, las aguas eran un bien accesorio del inmueble al cual estaban destinadas.
- La regularización de los derechos de aprovechamiento de las aguas destinadas a beneficio de los predios expropiados, a través del artículo 5° transitorio del Código de Aguas en vigencia, puede efectuarse por el propietario actual del predio, el que en general es un titular diverso al asignatario CORA original.

Atendidas las razones precedentemente expuestas, se estima que la Dirección General de Aguas, al publicar el inventario de extracciones de cada acuífero en el que se presume la existencia de derechos de aprovechamiento de aguas provenientes del proceso de reforma agraria, deberá identificar un listado de los proyectos de parcelación con plan de distribución de aguas, para efectos de que los titulares de derechos regularizados por el artículo 5° transitorio del Código de Aguas, y quienes aún no han regularizado sus derechos pudiendo hacerlo, puedan identificar que se encuentran comprendidos dentro del citado inventario.

---

#### **I.4 PROGRAMA EJECUTABLE**

El programa que permite el despliegue de la información contenida en la base de datos, corresponde a una interfase gráfica con plataforma en Access, a través de la cual es posible administrar amistosamente la información recogida y verificada durante la ejecución del proyecto. Dicha interfase permite realizar filtros de búsqueda, con uno o más criterios, así como imprimir y generar archivos con los resultados obtenidos.

Los criterios de búsqueda son los siguientes:

- Región
- Sector Acuífero
- Comuna
- Tipo de Expediente
- Expediente
- Fecha de Resolución
- N° de Resolución
- CBR
- Año de Registro en el CBR
- Titular

Una vez realizada la búsqueda, se activan las opciones de salida de información entre las cuales se encuentran la opción de impresión y la de generar un archivo en Excel, entre otros.

En las figuras siguientes se ilustran la Carátula Principal de Entrada a la Interfase (Figura I.1), luego las opciones de Filtrado y Búsqueda de la Información (Figura I.2) y finalmente un ejemplo de despliegue de la Información Obtenida (Figura I.3).

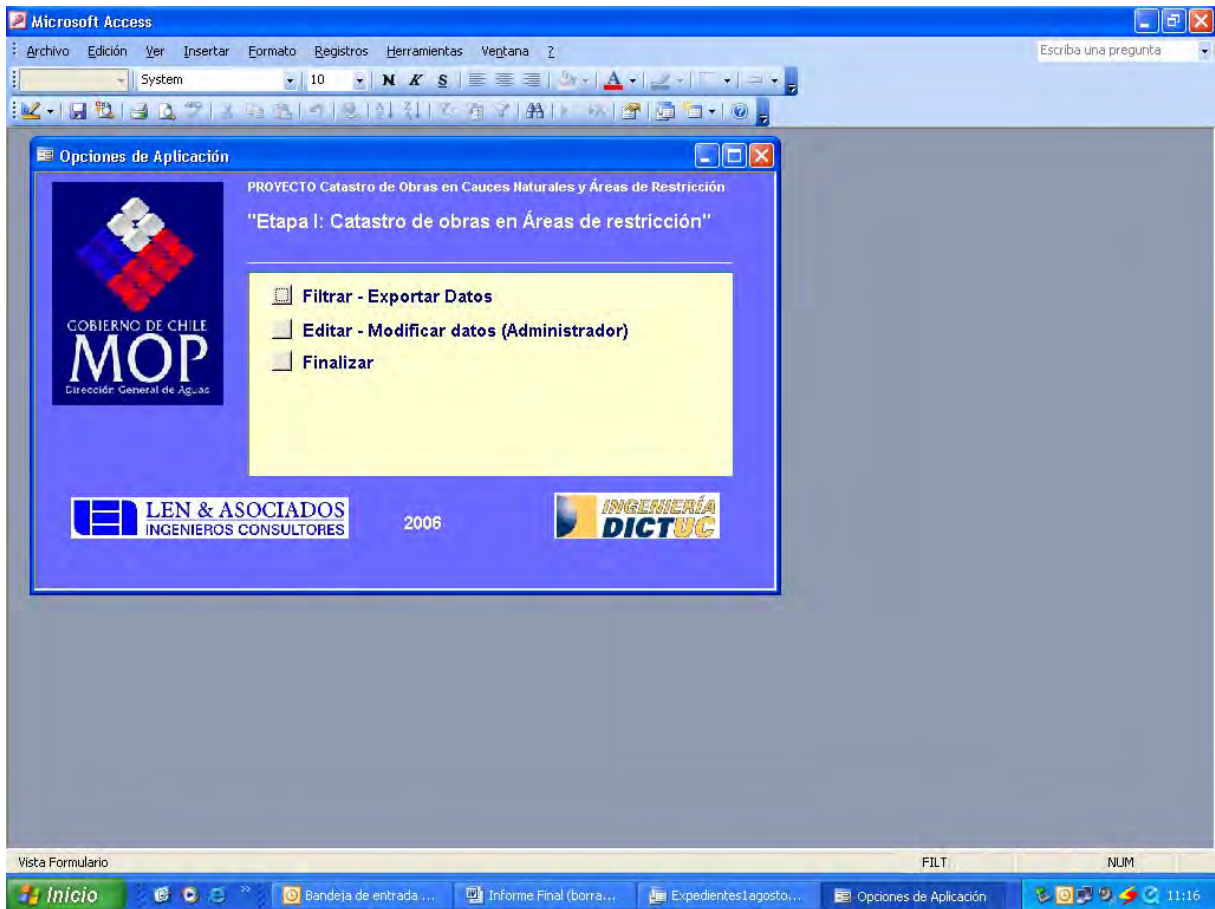

Figura I.1. Carátula de inicio de la Interfase.

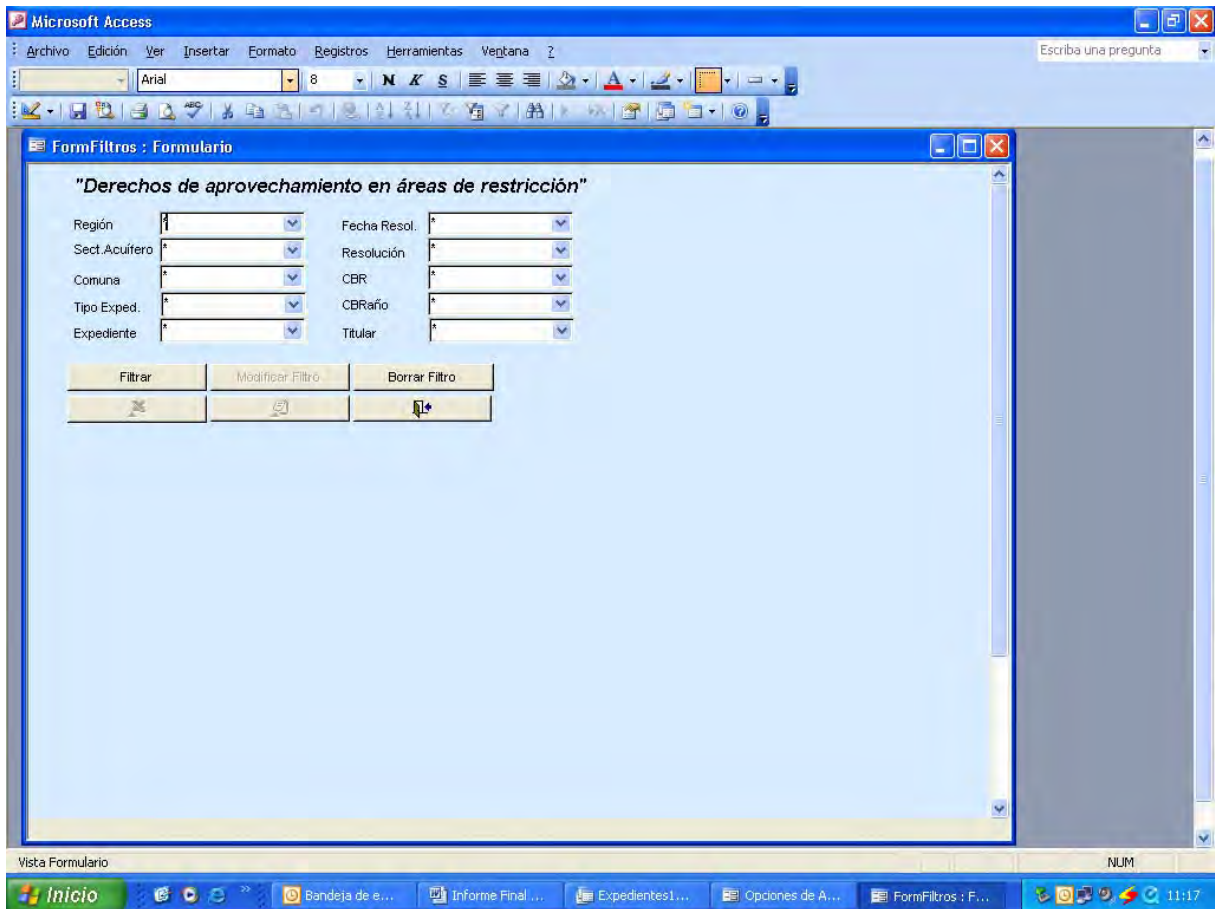

Figura I.2. Opciones del filtro de búsqueda de la información.

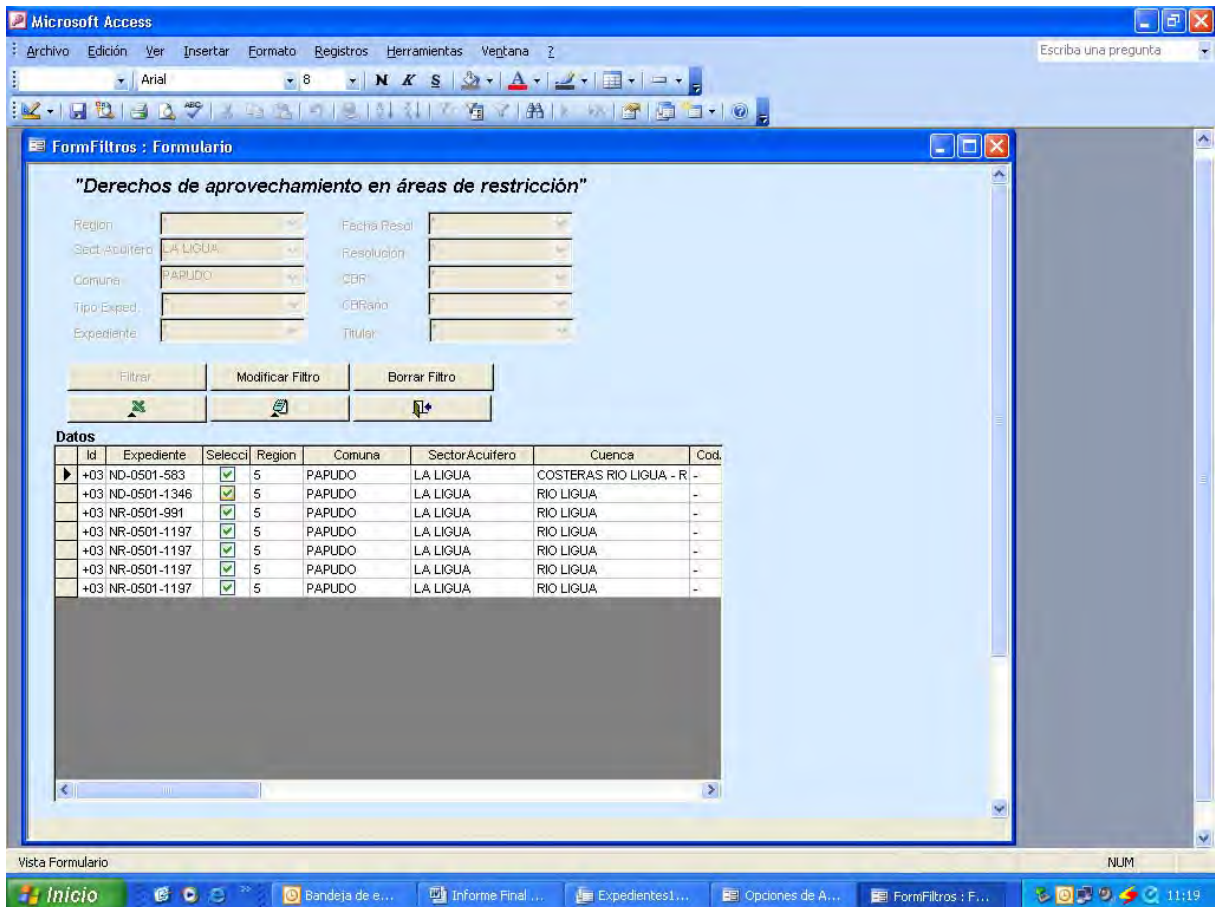

Figura I.3. Despliegue de la información en pantalla y opciones de salida. Ejemplo: Sector Acuifero La Liga, Comuna de Papudo.

## I.5 RESULTADOS

Los resultados logrados en esta etapa de proyecto se pueden resumir en el número de Registros de Derechos de Aprovechamiento, los efectivamente inscritos en los Conservadores de Bienes Raíces y los caudales comprometidos en cada uno de los sectores acuíferos, según se indica en las siguientes tablas.

Tabla I.5. Numero de Registros de Derechos de Aprovechamiento por Sector Acuífero.

| Región                 | Sector Acuífero                      | Número de Derechos de Aprovechamiento |
