

INSTITUTO DE INVESTIGACION DE RECURSOS NATURALES - CORFO

CATASTRO DE POZOS

HOYA N°308 MAIPO

INTRODUCCION

La presente publicación corresponde a la Decimoquinta que se realiza sobre materias de Hidrología Básica , ordenadas por Divisiones o Cuencas Hidrográficas, que se están divulgando como contribución al Programa Hidrológico Internacional.

La realización de este trabajo ha sido posible gracias a la colaboración de las diversas empresas particulares y estatales, dedicadas a la investigación y explotación de los recursos de Agua Subterránea.

La compilación y elaboración de estos antecedentes ha sido efectuada por la Sección Hidrometría de la División de Recursos Hidráulicos, actualmente integrada al Instituto de

En esta oportunidad se presentan los principales antecedentes de los pozos perforados, con maquinaria especializada, en la División Hidrográfica N° 308 correspondiente a la Hoya del Río Maipo, cuya construcción fue terminada antes del 12 de Septiembre de 1975.

La actual versión invalida a las dos anteriores, pues en ella se han efectuado algunos cambios, que afectan tanto a la ubicación y numeración de los pozos, como a sus características y nombre de los predios en que se sitúan y el de sus propietarios.

Se solicita a las empresas vinculadas al estudio y explotación del agua subterránea, hagan llegar al Instituto de Recursos Naturales, cualquier antecedente que permita corregir en futuras versiones los posibles errores u omisiones en que accidentalmente se pudiera haber incurrido.

La mecanización mediante el empleo de computador en el manejo y publicación de información hidrogeológica, ha obligado a adoptar diversas abreviaturas y claves, que en múltiples ocasiones no se

ajustan a reglas gramaticales , lo cual hacen necesario adoptar las siguientes convenciones :

1.- COLUMNA PREDIO

ALD CAMP	ALDEA CAMPESENA	MOL	MOLINO
AS ASEN	ASENTAMIENTO	N	NUESTRA
AV	AVENIDA	NVA,NVO	NUEVA NUEVO
C	CLUB	PAR, PARC	PARCELA
CAMPAM	CAMPAMENTO	PBLO	PUEBLO
CEMENT	CEMENTERIO	PLTA, PTA	PLANTA
CERA	CENTRO DE REFORMA AGRARIA	POB, POBL	POBLACION
COM	COMUNIDAD	PRRQUA	PARROQUIA
COOP	COOPERATIVA	PZA, PLZA	PLAZA
CTRO	CENTRO	QUILI	QUILICURA
CHAC, CHACR	CHACRA	REC AP	RECINTO DE AGUA POTABLE
DEPOS	DEPOSITO		
E. EXP	ESTACION EXPERIMENTAL	RES	RESERVA
EDIF	EDIFICIO	RINC	RINCONADA
EMP	EMPRESA	S, STA	SAN O SANTA
ESC, ES	ESCUELA	SAT	SATELITES
EST	ESTACION	SOC	SOCIEDAD
ESTAD	ESTADIO	TIN	TINTORERIA
FAEN	FAENADORA	VIN	VINICOLA
FCA, F	FABRICA		
FDO	FUNDO		
GER ALDERE	GERONIMO DE ALDERETE		
HIJ	HIJUELA		
HOS	HOSPITAL		
HUER	HUERTO		
IND, INDUS	INDUTRIA		
MAEST	MAESTRANZA		
MANUF	MANUFACTURAS		
MAT	MATADERO		
MIL	MILITAR		
MIS	MISIONEROS		

2.- COLUMNA PROPIETARIO :

3.-

La mayoría de las abreviaturas usadas en esta columna corresponden a siglas de Instituciones Estatales ampliamente conocidas, por lo cual no se ha estimado necesario abundar en mayores explicaciones.

3.- COLUMNA CONSTRUCTOR :

CORFO	:	RECURSOS HIDRAULICOS - CORFO
DOS	:	DIRECCION DE OBRAS SANITARIAS
CAS	:	CAPTACION DE AGUAS SUBTERRANEAS Actualmente CAPTACUA.
CELZAC	:	CELEDON Y ZAÑARTU CIA. LTDA.
SACO	:	SAAVEDRA Y COBO SOCIEDAD CONSTRUCTORA
NO IDENTIF:	:	NO IDENTIFICADO

4.- COLUMNA USO :

Indica el uso principal a que se destina la captación y su situación actual, de acuerdo a la siguiente Pauta :

R	:	REGADIO
I	:	INDUSTRIAL
P	:	AGUA POTABLE
E	:	ESTUDIO
O	:	OBSERVACION

A excepción de los pozos signados como de Estudio y Observación, cuando la letra que individualiza el uso se encuentra sola, significa que la captación, a la fecha de esta publicación, dispone de equipo de bombeo y por lo tanto se encuentra en operación.

Si por el contrario, la captación no dispone de equipo de bombeo, la clave que determina el uso irá seguida de las letras " SU".

Si la captación, cualquiera sea el uso a que está destinada, se encuentra sin cañería de habilitación, obstruida o en general en mal estado, la clave que individualiza su uso irá precedida de las letras " AB" (abandonado).

6.- UNIDADES USADAS:

Las cantidades que indican profundidades están expresadas en mts., los caudales en lts/seg y los gastos específicos en lts/seg/mts.

Por depresión (DEP) debe entenderse nivel de bombeo para el gasto (Q) considerado, menos el nivel estático (NE).

7.- COLUMNA AQ :

Indica si se dispone o no de análisis químico.

En el cuadro precedente se han agrupado los pozos según uso y situación actual. Los caudales expresados en L/s que en él aparecen, corresponden al máximo con que se probó cada pozo, estimándose que el caudal potencial posible de ser extraído con las actuales instalaciones de bombeo, debe exceder alrededor de un 25% al anotado en dicho cuadro. Las profundidades indicadas corresponden a las de perforación.
